Experience

May 2020 - Present

DeHaat | Gurugram, Haryana, India

Lead Software Engineer

Leading a team of 8 frontend developers that over the past two years developed frontend from scratch over 4 products with 85% code coverage by unit testing, 95% on time delivery, and managed to ship the highly optimised code.

Delivered UI screens with high accuracy to the reference of the given designs.

Building multiple teams from scratch and setting up processes & standards for increasing developer productivity.

Develop high and low level designs to help junior developer to understand the features.

Hands-on react, react-native, redux, expo, unit testing, app profiling, mixpanel, google analytics and ci-cd pipeline.

May 2019 - May 2020

Nagarro | Gurugram, Haryana, India

Senior Associate - Technology

Handled a complete account individually, client was a big consultation firm.

Migrated their main website from core JS to react.js.

Delivered significant improvements as part of performance, scalability, and coding standard across brand website.

Worked with a few sitecore developers, .

Got good exposure to react, vanilla JavaScript, html, css, npm, google analytics and webpack.

Dec 2018 - May 2019

Nouveau Labs | Bangalore, Karnataka, India

Senior Software Engineer

Led a team of 4 frontend developers for a UAE based telecom client.

Built a B2C platform from scratch, with 90% code coverage, integrated sentry for real time issue alerts.

Got an opportunity to develop UI for a chat bot name ASK AI along with in-house AI and ML team.

Used react, angular 8, angular material, sentry, google analytics

Sept 2015 - Nov 2018

OpenText | Hyderabad, Telangana, India

Senior Software Engineer

Joined as an engineering intern and promoted to a full time in short span of 5 months.

Started as QA Engineer and got experience working on automation and build tools like Selenium webdriver, JMeter, lighthouse, karma jasmine, jenkins and perforce.

Later got an opportunity to work in UI development and got exposure to backbone.js, marionette.js, handlebar.js, underscore.js, jquery, and many other supporting libraries.

Hands on Open Text Extended ECM for SAP SuccessFactors, which gives content management capabilities for SAP cloud HCM SuccessFactors.
